PROFILE

M.Sc. student in Cybernetics and Robotics at NTNU, with a completed B.Sc. in Automation and Intelligent Systems. Robotics, autonomy and control, with hands-on experience from ROS 2 systems, simulation in NVIDIA Isaac Sim, and industrial software development.

SKILLS

Programming: C/C++; Python; MATLAB; PLC ST/Ladder; TypeScript/React

Robotics & Autonomy: ROS 2; NVIDIA Isaac Sim; UGV and surface-vessel platforms; sensor integration; guidance and navigation; operator interfaces (Qt)

Control & Modelling: control theory; MPC; system identification; Simulink; OPC

Systems & Tooling: Linux, incl. embedded (Jetson); Docker Compose; Git; networking, reverse proxying and monitoring

EXPERIENCE

Marinor NTNU

Sep 2026 – Present

Autonomy Engineer (Voluntary technical position)

Trondheim, Norway

- Student organization developing autonomous maritime vessels; member of the Ocean Autonomy Cluster.
- Works on the autonomy stack, covering guidance and navigation for an autonomous surface vessel.

KONGSBERG

Jun 2026 – Aug 2026

Summer Intern - Software, Lone Wolf

Kongsberg, Norway

- Contributed to the development of a new unmanned ground vehicle (UGV) platform for the Lone Wolf project, including design and integration of a new platform concept.
- Established communication between sensors, actuators, and operator systems; developed the ICS operator panel and the panel–platform link.
- Developed, tested, and verified ROS 2-based autonomy software (C++).

NTNU

Teaching Assistant • Trondheim, Norway

Guides students through problem sets and lab work, gives academic follow-up, and supports course staff in delivery.

TDT4136 Introduction to Artificial Intelligence

Aug 2026 – Present

IELET2107 Robotics & Machine Vision

Aug 2026 – Present

AIST2102 AI for Robotics & Automation

Jan 2026 – May 2026

ISTT1002 Statistics

Aug 2025 – Dec 2025, Aug 2026 – Present

Trondheim Kino

Jun 2021 – Present

Part-time: Shift Leader, Bartender, Sales Host

Trondheim, Norway

- Shift leader responsible for daily operations, staff training, and customer service; introduced procedures that improved efficiency in ticketing and kiosk sales. Also works independently in the cinema bar with responsibility for alcohol service.

Norwegian Armed Forces

Aug 2022 – Jan 2024

Communications Operator — Ground Based Air Defense

Ørland, Norway

- Operational experience with communications systems in a high-readiness environment as part of the NATO Response Force; ensured secure and effective communication between GBAD systems under demanding conditions.

EDUCATION

NTNU

Trondheim, Norway

- M.Sc. in Cybernetics and Robotics

• Specialization in Robotics and Vehicle Control.

Aug 2026 – Jun 2028
- B.Sc. in Automation and Intelligent Systems

• Three-year degree in control engineering, robotics, autonomy, and intelligent systems.

• Graduated with grade A.

Aug 2023 – Jun 2026

PROJECTS

- B.Sc. Thesis: Lone Wolf synthetic test environment** (with KONGSBERG)

Jan 2026 – Jun 2026

• Built a modular, configurable synthetic test environment in NVIDIA Isaac Sim for the planned Lone Wolf UGV, designed to support future platform, payload, and sensor configurations.

• Focused on interface consistency (/clock, TF, topics), repeatable scenario execution, and closed-loop testing to reduce dependency on physical hardware during development.

• Delivered a simulation workflow usable as a practical extension of the physical platform and a foundation for synthetic data generation and perception testing. Team of four.
- Informize - digital information screens (web app)**

2025 – Present

• Built a full-stack web app for creating and running unattended “public screens” (digital signage): screens, content, and playback designed for stable always-on display.
- Automation Project - Water Tank Control**

2025

• Developed a discrete-time PID/PI-D controller in PLC Structured Text, including tracking/bumpless transfer, anti-windup, derivative filtering, and lead-lag feedforward for disturbance compensation.

• Built a closed-loop simulation setup by coupling PLC and Simulink via OPC, plus data-driven modelling (MATLAB System Identification / NLARX) to tune and validate behaviour before deployment.

LEADERSHIP & VOLUNTEERING

Elektra Student Association

Student association for electrical engineering students at NTNU • Trondheim, Norway

- Auditor

• Reviews the association’s accounts independently of the board, reconciles reported figures against source documents, and signs the audit report presented to the general assembly.

Aug 2026 – Present
- Event Committee Member

Aug 2023 – Jun 2026
- Financial Manager / Treasurer

• Owned budgeting, accounting, and financial planning for an association with several hundred members.

• Established routines for financial control that improved oversight of income and expenses and made handover to the next board straightforward.

Oct 2024 – Nov 2025
- Financial Manager, Event Committee

Aug 2023 – Oct 2024

Omega Student Association

Sep 2026 – Present

- Cabin Committee Member — Heuttemcommiteen (Voluntary)

Trondheim, Norway

• Responsible for operation, maintenance, booking, and promotion of the association’s cabin, including hands-on maintenance weekends and practical upkeep of the building.

Stormrevyen

Jun 2021 – May 2022

- Manager and Treasurer (Voluntary)

Trondheim, Norway

• Led an annual school revue with 150+ participants, responsible for planning, rehearsals, and execution, and owned budgeting including ticket revenue and sponsorships.

ADDITIONAL

Languages: Norwegian (native), English (fluent) | **Citizenship:** Norwegian | **Driver’s license:** Category B
Security clearance: Held during service with the Norwegian Armed Forces (2022–2024)
Availability: Summer internship 2027; full-time from Jun 2028
